## Wynn's Detail Polymer Sealant

Wynn's Detail Polymer Sealant and car polish combines the benefits of a polymerised silicone paint sealant with Carnuba wax, to protect and beautify all types of automotive paintwork and metallic trim.

### Key Benefits:

- Removes light scratches and blemishes
- Cream texture spreads and coats surface easily
- Provides UV protection
- Repels water and dirt
- Polishes effortlessly to a durable shine

### Applications

Detail Polymer Sealant is suitable for all clear-coat and painted applications and contains a light diminishing abrasive compound for removing oxidised paint caused by sun damage. Use to achieve a wax gloss as well as a sealant for extended protection against the elements.

### Directions for use:

- Wash car and remove excess water
- Shake bottle & apply a light coat of Detail Polymer Sealant with damp cloth
- Apply section by section
- As the polish dries to a haze, buff to a shine with a soft dry cloth
- Do not use on plastics or vinyl where surfaces are dipped
- To remove old wax build-up, use Wynn's Revive to prepare the paintwork before applying Detail Polymer Sealant.

Odour : Characteristic

### Health and Safety Data.

Material Safety Data Sheets are available from the company

### Shelf Life.

Whilst Wynn`s products are formulated to have as long a shelf life as possible, other factors do influence their actual useful life. Handling and storage conditions can cause packaging deterioration which could render the product unfit for further use.

From time to time products are superseded by upgraded products and/or changed formulations and older products will no longer have the same performance level or be compatible with latest technology being introduced into equipment.

It is therefore the responsibility of the purchaser of the product to ensure proper storage conditions, stock rotation and timely usage to prevent products from becoming unsuitable for use.

Expiry date: 3 Years from manufacture date.
