TECHNICAL DATA SHEET

Wynn's Engine, Diff and Gearbox Stop Leak

Wynn's Engine, Diff and Gearbox Stop Leak is an oil additive for the crankcase, differential or manual gearbox. It is a seal rejuvenator and viscosity index improver for dual action leak prevention.

1. Swells and nourishes all hardened or shrunken rubber, Nitrile, NBR, Silicone, Fluorelastimer or Polyacrylate oil seals to stop oil seepage.
2. The VI Improver prevents oil thinning as engine temperature increases preventing oil passing past the rings into the combustion chamber where it burns out producing smoke.

Key Benefits

- Rejuvenates hardened oil seals before having to replace them
- Reduces smoke and oil consumption
- Stops external leaks
- Can be used in the crankcase, diff or manual gearbox

Applications

- For vehicles with oil leaks
- Hardened valve stem seals
- External leaks
- Prevents blow-by smoke

Directions for use:

- Add to warm oil to facilitate mixing
- 375ml treats 4-6 Litres of oil

Pack sizes.
12 x 375ml

Physical Specifications:

Odour: *Characteristic*
Appearance: *Viscous Amber oil*

Health and Safety Data.

Material Safety Data Sheets are available from the company

Shelf Life.

Whilst Wynn's products are formulated to have as long a shelf life as possible, other factors do influence their actual useful life. Handling and storage conditions can cause packaging deterioration which could render the product unfit for further use.

From time to time products are superseded by upgraded products and/or changed formulations and older products will no longer have the same performance level or be compatible with latest technology being introduced into equipment.

It is therefore the responsibility of the purchaser of the product to ensure proper storage conditions, stock rotation and timely usage to prevent products from becoming unsuitable for use.

Expiry date: 3 Years from manufacture date.
