TECHNICAL DATA SHEET

Wynn's Valve Guard –lead substitute

Wynn's Valve Guard is an emission free, environmentally friendly, lead substitute solution to protect the older vehicle when running on unleaded petrol. Valve Guard will prevent valve seat recession, free sticky valves and lubricate the upper cylinder improving general performance. Valve Guard is compatible with normally aspirated as well as turbo charged vehicles and will not affect catalytic converters.

Key Benefits

- Prevents valve seat recession
- Frees sticky valves
- Lubricates upper cylinder

Applications

For older petrol engines intended to run on leaded petrol.

Directions for use:

- Add Valve Guard to each tank of unleaded petrol when filling up.
- 200ml treats 50 Litres unleaded petrol

Appearance: *Indigo Blue Liquid*

Health and Safety Data.

Material Safety Data Sheets are available from the company

Shelf Life.

Whilst Wynn's products are formulated to have as long a shelf life as possible, other factors do influence their actual useful life. Handling and storage conditions can cause packaging deterioration which could render the product unfit for further use. From time to time products are superseded by upgraded products and/or changed formulations and older products will no longer have the same performance level or be compatible with latest technology being introduced into equipment. It is therefore the responsibility of the purchaser of the product to ensure proper storage conditions, stock rotation and timely usage to prevent products from becoming unsuitable for use.

Expiry date: 3 Years from manufacture date.
